

## Knobs for SC-1

These are the knobs I use on the SC-1mk2 preamp. There is a brass set screw so you can use this knob on 1/4" shaft. I think it's a pretty cool looking knob. The finish is smooth, and the feel is great. It doesn't feel like "DIY", if you know what I mean.

I am sorry, but these knobs are NOT made of virgin forest exotic wood, or dipped in C37 lacquer and costs \$500. I think you're on the wrong website if you're looking for that kind of stuff here. :) NOTE: FREE SHIPPING for this item, if you order another product. Otherwise, shipping charge will be an extra \$6 for US customers and \$8 for INTL customers.

Only \$4 per set of (2) pieces

For USA & INTL Buyers. See NOTE above regarding FREE SHIPPING.
