

## PSU-Cable 4-wire

PSU-CABLE4 is a polarized 4-pin/conductor wire assembly with Male and Female mating connectors. The mating connectors are Black nylons with clip releases. #22AWG wire, 12 inches in length.

Use the Female side of the connector to connect to your PSU-1848/2448. That way, the terminals carrying power are not exposed. Use the Male side of the connector to connect to your SC-1 preamp. I personally use the following color code convention:

BLACK - Connect to GND

YELLOW - Connect to +48V

RED - Connect to +18V

GREEN - Connect to -18V

NOTE: FREE SHIPPING for this item, if you order another product.  
Otherwise, shipping charge will be an extra \$6 for US customers  
and \$8 for INTL customers.

Only \$4 per cable

For USA & INTL Buyers. See NOTE above regarding FREE SHIPPING.
