

1U Power Transformer Kit

The Power Transformer Kit is composed of a toroid transformer and related parts to supply power to your project. The transformer is a toroidal transformer with dual primary (115V+115V operation), and dual secondary with mounting hardware included.

The Power Transformer Kit can be used with the PSU-2448mk2 Kit or PSU-4448mk2 Kit AND will fit in a 1u rack.

Toroidal transformers are used mostly in noise-sensitive equipment like mic preamps and high-end audio projects. These transformers are constructed to high standards, and are certified to or in compliance with most worldwide safety agency standards. Transformers uses unique double-insulated primary leads.

Along with the transformer, you also have a standard IEC power inlet, fuse holder, fuse (with an extra spare fuse), a mini toggle power switch, and a Red panel mount LED indicator. The LED indicator lamp is rated 2.1 volts and can be connected directly to the PSU-2448mk2 Kit above (in place of LED1 or LED2)

Features:

- Everything you need to power up your PSU-2448mk2/PSU-4448mk2, SC-1mk2 and X-12 Preamp Kits
- Toroidal transformer (will fit in a 1u rack case)
- Lots of spare power for multiple preamp channels
- High quality DPDT mini toggle switch
- High quality panel mount LED lamp
- Includes mounting kit for toroid transformer
- Mounting hardware: metal dish, 2 foam pads, bolt, washer, and nut (Note: bolt will need to be cut to fit in a 1u rack)
- Dual primary for 115+115V, 50/60Hz operation
- Highpot tested at 4K VRMS
- Secondary voltage tolerance: within 3% at normal input and full load
- Efficiency: 84.8%

Only \$39 per kit
