This is our new Mic Preamp in the API-500 Series card format. We're bringing all the quality of the original SC-1 and some more, plus new additional features in this new form factor. MSRP: \$425 (Stock - Transformerless)
MSRP: \$495 (with Cinemag Transformer)

If you want a good sounding preamp with little risk or ambiguity (no sourcing of parts) the Five Fish SC-1 are wonderful meaty units for little money. - Garrett Haines, Recording Tips Editor, Tape Op, Chief Mastering Engineer, Treelady Studios www.treelady.com Features:

- Popular 500-form factor
- All solid-state design, using chipsets from THAT Corp and Burr-Brown
- Soft-start, slow ramp-on +48V phantom power
- Crystal clear Red LED indicator for phantom power
- Electronically balanced input and output stages
- or with optional Input Transformer option
- Improved design, improved performance, design refinements.
- DC Servo, Dual Buffered design
- Using uMetal shielded Input Transformer for excellent magnetic shielding
- 6dB gain steps in the lower range, and 4db gain steps in the upper range for more precise control
- Bourns, conductive plastic potentiometers
- 12-position Grayhill gain selector switch
- Input RFI protection
- Input clamping protection
- Output surge protection circuit
- Output RFI protection
- 0.063" thick PCB with 2 oz. copper, Solder mask, silkscreen, plated-through holes, - Lead-free Rohs
- Gold fingers
- 5-LED VU Meter kit
- Relay-controlled Polarity Reverse
- Use of high quality 1% Metal Film resistors, and high-quality ceramic and electrolytic capacitors
- Easy to assemble, easy to troubleshoot design
- Each component carefully labeled, protected and packed in separate zip bags
- Very affordable!!!
